

Senior Fullstack Software Developer & Scrum Master

Anthony Vo

I'm a creative thinker and do-er who have a strong passion with more than 12 years of experiences in software development. My professional focus is to develop and design ecommerce & management systems as well as trading platforms, and customer services. I always try to understand my target audience as much as I can by using marketing strategies to interact with clients and add values into services provided in order to build a long-term relationship.

- 👤 Full Name: Anthony Vo
- 📅 DOB: 29th June
- ♀ Gender: Male
- 📍 Location: Melbourne, Vic 3000, Australia
- 📞 Phone: (+61) 435 319 319
- ✉ Email: thanhvo.melbourne@gmail.com

My Responsibilities

Software Development

- Develop winform applications, web applications, web services, mobile applications and design UI/UX web
- Research and apply new technologies
- Find solutions for issues and build architecture for systems
- Review team member's source code and refactor code
- Integration with APIs from third parties
- Writing automated test

Process And Development Practices

- Follow software development process, especially Scrum agile disciplines and principles
- Contribute ideas to improve process and development practices
- Defines communication channels and expectations between developers and project stakeholders
- Sets clear roles and responsibilities for your entire team (developers, designers, project managers, etc...)
- Provides an agreed-upon "definition of done" for each step to stop scope creep and help keep the project moving
- Formalizes how to handle bugs, feature requests, and updates

Communication And Collaboration

- Join daily meeting with customers and team members, make sure all relevant information to the team and project is shared and discussed before acknowledgement
- Support team members and customers in ideas, solutions and technical issues
- Manage and track the tasks of team members
- Onsite in customers' side to get requirements and business rules of system, recommend ideas for customers
- Handle problems in a short time directly

Scrum Master

- Formulating techniques for effective Product Backlog Management
- Clearing obstacles
- Establishing an environment where the team can be effective
- Addressing team dynamics
- Ensuring a good relationship between the team and product owner as well as others outside the team
- Protecting the team from outside interruptions and distractions

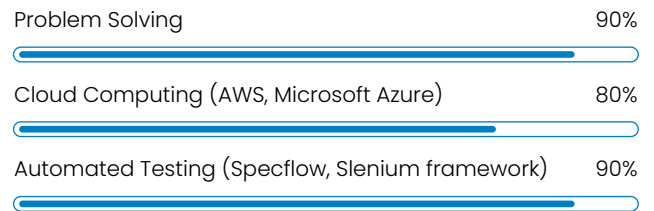

Anthony Vo

Microsoft

Microsoft Certified Solutions Associate

Microsoft Certified Solutions Associate (MCSA) validates a comprehensive set of skills necessary to perform the job role of Systems Administrators.

Certificate

08/2015

Epi Server

Epi Server CMS 7

Episerver is a content management system (CMS) for web publication developed in Sweden. Episerver CMS is used to enable multiple web editors to jointly develop a larger organisation's external website, extranet or intranet. The web editors need not install any special software on their computers as they can use a web browser to edit web pages. Nor do the web editors need to know about HTML and other underlying technologies. Instead, they can work in a similar manner to standard word processing. Episerver CMS is based on Microsoft's .NET platform.

03/2014

Microsoft

Programming in HTML5 with JavaScript and CSS3

Programming in HTML5 with JavaScript and CSS3 exam is one of the two exams required to get your Microsoft Certified Solutions Associate (MCSA) Web Applications Certification.

11/2021 - Current

Netwealth

Senior Full Stack Software Developer & Scrum Master

📍 Melbourne, Victoria, Australia

Netwealth offers a range of innovative portfolio administration, superannuation, retirement, investment and managed account solutions to investors and non-institutional intermediaries including financial advisers, private client and high net worth firms. Netwealth's award-winning platform is currently rated Australia's Number 1 Platform for overall functionality and overall satisfaction* providing wealth professionals with the technology required to efficiently manage and add value to their clients.

As the leader of Century team, I feel proud that our team is the main team responsible for share trading and pension payment products.

In Netwealth, .Net and Angular are the 2 main languages. Azure is where we deploy the product. In addition, many new and popular technologies have been researched and used in our products.

07/2018 - 11/2021

Cognology

Senior Full Stack Software Developer & Offshore Leader

📍 Melbourne, Victoria, Australia

Build technology to help our clients with performance, engagement, retention and learning for their entire employment lifecycle. Our research and development efforts are continually looking for ways to make it easier for our customers to execute business strategy, develop their people and do great things together. Angular, .Net and AWS are the core technologies we built this amazing product on. Our platform targets HR of companies and corporations, it makes management easier than ever.

08/2016 - 07/2018

Future Business System

Senior Full Stack Software Developer & Technical Leader

📍 Cheltenham, Victoria, Australia

Our responsibility is to create an enterprise management solution that empowers our clients to achieve the full potential of their business.

Our Harmony platform is developed exclusively in Australia. It is comprised of over sixty software modules.

I was involved in e-commerce platform projects from the first system design steps to the final customer support step as well as built an enterprise management system technology and expert customer support for the retail & wholesale industry. Offering solutions for product development and manufacturing, supply chain, inventory control, financials, wholesale, retail, point of sale and e-commerce.

10/2015 - 04/2016

SmartOSC

Senior Full Stack Software Developer

📍 Hanoi, Vietnam

I've been on several e-commerce platform projects here as well as trained in SiteCore - a very famous e-commerce CMS in the world that our clients (Australian based) use a lot and it's developed by .Net technology.

Full-time

07/2015 - 10/2015

Niteco

Full Stack Software Developer

📍 Hanoi, Vietnam

I've been on several e-commerce platform projects here as well as trained in EpiServer - a CMS that our clients use a lot and it's developed by .Net technology.

03/2013 - 07/2015

FPT Software

Full Stack Software Developer

📍 Danang, Vietnam

This is first place where I started with my passion for software programming. The projects I have experienced such as RamQuest One, Pavaso, ADB, Cleopath... The main domain of these projects is about software for title insurance in the US. .Net is used as a main technology (Winform and WCF). The goal of those projects is to re-architect the application by redesigning the old system, replacing desktop-based UI by web-based UI and deploy to cloud as Saas.

Part-time & Freelance

10/2021 - Current
